PROFILE SUMMARY

Data Science & AI engineering student at ESPRIM (Monastir) with hands-on experience building end-to-end AI systems: LLM-powered agents, vision-language document extraction, deep learning for medical imaging and offline speech wake-word detection. Also experienced in the full-stack and microservice platforms that bring these models to users (Python, FastAPI, React / Next.js, Node.js, PostgreSQL, Docker). Hedera Certified Developer Associate.

EDUCATION

Engineering Degree in Data Science & AI	2026 ESPRIM, Monastir
Bachelor's Degree in Computer Science	2022 - 2023 Higher Institute of Computer Science, Mahdia
Baccalaureate, Computer Science Option	2017 - 2018 Lycée Fattouma Bourguiba, Monastir

PROFESSIONAL EXPERIENCE

Full Stack Engineering InternAnypli | Aug 2026

- Designed and built **TouriBook**, a tourism booking platform: 7 FastAPI microservices (one PostgreSQL database each), an API gateway, a Next.js SSR client and a React admin, in FR / EN / AR.
- Guaranteed zero overselling with a booking saga, compensation and atomic SQL updates validated by concurrency tests; integrated Stripe with signed, idempotent webhooks.

Technologies: FastAPI, PostgreSQL, Next.js, React, TypeScript, Stripe, Docker

AI & Data Science InternTradrlly | Jun 2026 - Jul 2026

- Astro**: built a local-first AI agent (Electron / React, Node.js, FastAPI) that understands French and English commands and controls the computer, using a regex → spaCy → LLM (Gemini / GPT-4o) cascade that keeps working offline.
- DOOBY**: developed a zero-shot vision-language pipeline extracting bilingual Arabic-French timetables into schema-constrained JSON (F1 87.3%, 100% exact Arabic labels).
- DOOBY**: made the offline "Hey Dooby" wake-word detector operational and built a real-time bench to calibrate its threshold (6/6 detections, no false triggers).

Technologies: Python, FastAPI, spaCy, Gemini, faster-whisper, OpenWakeWord, ONNX, Node.js, Electron, React

Frontend Developer InternNeuralbey | Jul 2025 - Aug 2025

- Developed the company's corporate website: landing page, contact form, internship offers with an application flow, and a back-office to manage applications and interns.

Full Stack Developer Intern (Final Year Project)TriosWeb | Mar 2023 - Jun 2023

- Developed an HR management dashboard to manage employees, leave and performance reviews, and to track resources and indicators.

SKILLS

AI & Deep Learning:	CNN, EfficientNet, Grad-CAM, NLP (spaCy, SBERT, Transformers), LLMs & Vision-Language Models (Gemini), Speech (Whisper, ONNX)
Data Science & ML:	Python, Pandas, NumPy, Data Visualization, Jupyter Notebook
Backend Development:	FastAPI, Node.js, Express.js, Django, REST APIs, Microservices, JWT Authentication
Frontend Development:	React, Next.js, TypeScript, Tailwind CSS, HTML, CSS, JavaScript
Databases:	PostgreSQL, MongoDB, MySQL, Neo4j, SQLite, Mongoose, Prisma
Blockchain:	Hedera Hashgraph (certified developer)
Tools & DevOps:	Git, Docker, Vercel, Postman

PROJECTS

TouriBook – Tourism Activity Booking Platform (Microservices)	Anypli Aug 2026
Tourism activity booking platform for Tunisia: 7 FastAPI microservices (one PostgreSQL database each) behind an API gateway, a Next.js SSR client and a React admin; booking saga with atomic SQL updates guaranteeing zero overselling, Stripe with signed idempotent webhooks, QR-code vouchers, revocable JWT sessions, FR / EN / AR with RTL. <i>Technologies: FastAPI, PostgreSQL, SQLAlchemy, Next.js, React, TypeScript, Tailwind CSS, Stripe, MapLibre GL, Docker Compose</i>	
Astro – Local-First AI Agent	Tradrlly Jun 2026 – Jul 2026
AI agent (Electron + React app, Node.js orchestrator, FastAPI AI layer) that understands French and English commands, typos included, and controls apps, volume, brightness, files, windows, agenda and Pomodoro. A regex → spaCy → Gemini / GPT-4o fallback cascade keeps it working offline; voice via faster-whisper and TTS. <i>Technologies: Python, FastAPI, spaCy, Gemini API, faster-whisper, Node.js, Electron, React, Tailwind CSS, SQLite, ChromaDB</i>	
DOOBY – Timetable Extraction & “Hey Dooby” Wake-Word Detection	Tradrlly Jun 2026 – Jul 2026
• Timetable extraction: zero-shot vision-language pipeline converting Arabic–French school timetables (image or PDF) into schema-constrained JSON (precision 93.9%, recall 81.6%, F1 87.3%, 100% exact Arabic subject labels on annotated ground truth). • Wake-word detection: made the offline “Hey Dooby” detector (OpenWakeWord, ONNX) truly operational after diagnosing a silent fallback that faked detections; built a real-time bench to calibrate the threshold (6/6 detections, no false triggers). <i>Technologies: Gemini VLM, Prompt Engineering, JSON Schema, Node.js, Express, Python, OpenWakeWord, ONNX, Tkinter</i>	
Brain Tumor Detection – Web Application & ML Pipeline	ESPRIM Feb 2026 – Apr 2026
Built and trained deep learning models (CNN, EfficientNet) for MRI brain tumor classification with Grad-CAM explainability and uncertainty estimation; developed a REST API (FastAPI) and an interactive dashboard (Streamlit) containerized with Docker. <i>Technologies: Python, CNN, EfficientNet, Grad-CAM, FastAPI, Streamlit, Docker</i>	
AIR – AI-Powered Recruitment Platform	ESPRIM Oct 2025 – Apr 2026
MERN web app with AI CV parsing (spaCy Transformer + NER) and semantic matching (SBERT); FastAPI microservice for candidate-job scoring; recruiter / candidate / admin dashboards with interviews and real-time chat. <i>Technologies: MongoDB, Express, React, Node.js, FastAPI, spaCy, SBERT</i>	
Dental Diagnosis – ML Model & Web Application	ESPRIM Oct 2025 – Dec 2025
ML model and web application for dental diagnosis, with data analysis, metrics and visualizations in Jupyter Notebook (Python).	
Personal Portfolio Website	Personal Aug 2025 – Sep 2025
Responsive, SEO-optimized portfolio with smooth animations and interactions (alibenjannet.vercel.app).	
Medical Management Platform – Web & Desktop	ESPRIM Oct 2023 – Mar 2024
Web platform with a patient-assistance chatbot, messaging, pharmacy and appointment management modules, then rebuilt as a desktop application with a user-friendly JavaFX interface.	

CERTIFICATIONS

• Hedera Certified Developer Associate (HCDA)	Hedera Jun 2026
• Hedera Certified Foundation (HCF)	Hedera Jun 2026
• Hedera Business Foundation (HBF)	Hedera Jun 2026
• Project Ball (Bal des Projets) (Certificate of Participation)	ESPRIT 2026
• Project Ball (Bal des Projets) (Certificate of Participation)	ESPRIT 2025
• Data Science (Certificate of Participation)	ESPRIM
• C Language Bootcamp (Certificate of Participation)	Microsoft Club
• JavaScript Workshop (Certificate of Participation)	Microsoft Club
• C Language Workshop (Certificate of Participation)	Coursera
• Pascal Programming (Certificate of Participation)	Africa Code Week Tunisia
• Lifeguard Training (Certificate of Participation)	National Civil Protection Office

LANGUAGES

Arabic: Native • French: B2
English: B1 • Russian: Beginner

AWARDS

- The Africa Prize in the Pascal Program
- Project Ball (Bal des Projets) – Award
- Project selected for incubation

INTERESTS

Camping • Swimming • Card games
